

# We've come so far

*Tekst og musik Ole Grønne/Jan Kaspersen og Jette Torp*

I used to get my daily social kicks on the phone  
I used to make plans for my holidays alone  
And all that time the shadows just got darker  
Hearts were never meant to turn to stone

I spend a lot of time feeling sorry for myself  
I was sleeping by The News counting pictures on the shelf  
And all that time the shadows just grew longer  
Until you came and changed my way  
By your side the taste of life is stronger  
You showed me how to catch the day

We've come so far  
We've come so far - haven't we  
Suddenly your world will take another turn and it will  
Make your cold heart burn

We've come so far  
We've come so far - haven't we  
You will find another chance - not too far  
From where you are  
We've come so far

We've been running back and forth any way the wind has blown  
We have been around the block, I have children of my own  
But starry nights are there to be remembered  
Got to play the cards that you've been dealt  
No one takes a price for being sorry  
Empty hands are there for being held

We've come so far...

But starry nights are there to be remembered  
Got to play the cards that you've been dealt  
No one takes a price for being sorry  
Empty hands are there for being held

We've come so far...
